EDUCATION

University of Victoria
BSc in Computer Science | Victoria, BC

September 2023 – August 2026

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C, C++, Bash(Linux), YAML, HTML/CSS

AWS Services: S3, Lambda, DynamoDB, API Gateway, CloudFront, IAM, Amazon SNS, Route53, ACM, AWS CDK

Platforms & Tools: Git, Gerrit, Terraform, Kubernetes, GitHub Actions, Jenkins, Datadog, Zabbix, Mend/WhiteSource

Frameworks: React, Next.js, Node.js, Serverless Framework

AI & Developer Tools: GitHub Copilot, OpenAI, Amazon Bedrock, LangChain

Certifications: CKA: Certified Kubernetes Administrator (Sep 2026), AWS Certified Solutions Architect - Associate (Jan 2026)

PROFESSIONAL EXPERIENCE

Software Engineer Intern

January 2025 – August 2025

Planview

Vancouver, BC

- **Migrated 30% of core legacy Jenkins pipelines to GitHub Actions**, eliminating recurring build failures and improving reliability for a product development team.
- **Automated AWS IAM access key lifecycle management** using Python and AWS Lambda, disabling stale keys after 358 days and deleting them after 365 days, with proactive Slack alerts to improve credential security and reduce manual operations.
- Revamped **Datadog** monitoring by migrating from **Ansible to Terraform with CI/CD**, auditing 300+ monitors, enabling anomaly detection, and automating dashboard/log backups for disaster recovery.
- Collaborated with engineers across teams to standardize CI/CD workflows, improving developer experience.

Software Developer Intern

September 2024 – December 2024

INSPIRE

Victoria, BC

- Designed and deployed **scalable AWS serverless system** with Lambda, enabling reliable real-time delivery of AI-driven services.
- **Fine-tuned AI models** using Amazon Bedrock and OpenAI, applying prompt engineering to improve accuracy and personalization of responses.
- **Developed full-stack solutions** for nonprofits with React, TypeScript, and Node.js, integrating REST APIs and AWS infrastructure (CDK, Lambda) for reliable real-time delivery.
- Supported adoption by 3 nonprofit clients, with one campaign reaching **10% of its fundraising goal in 2 days**, validating platform impact.

PROJECTS

Pulse – Containerized Deployment Health Checker [<https://github.com/oliviachoi/pulse>]

October 2026

- Built and deployed a Python/FastAPI health-check service as a non-root **Docker container** with environment-based configuration for monitoring live endpoints.
- Automated **unit tests**, **container builds**, **runtime smoke tests**, and **vulnerability scanning** with GitHub Actions.
- Integrated into a separate AWS-hosted portfolio deployment workflow to perform **automated post-deployment validation** of the live site.

Synapse – nwHacks2025 [github.com/oliviachoi/Synapse]

January 2025

- Built an AI-powered PDF-to-diagram application using **OpenAI**, **LangChain**, Mermaid.js, **React**, and **TypeScript**.
- Designed a **serverless backend** with **AWS Lambda** and **Serverless** framework for scalable, event-driven processing.
- Built an interactive IDE and canvas using **Typescript** and **React** for editing and refining AI-generated diagrams.

AWS Cloud Resume Challenge [oliviachoidev.com]

May 2024

- Designed and implemented a serverless web app utilizing **AWS cloud services** (S3, Lambda, CloudFront, DynamoDB, Route53, ACM).
- Developed and implemented **Infrastructure as Code** using **Terraform** to provision and manage scalable deployments.
- Implemented **GitHub Actions** for version control and set up a **CI/CD** pipeline to streamline continuous deployment and updates, ensuring efficient and automated workflow.
